

Internal & External Competition
ROSIA Project Coordinator
(Temporary and Full Time Project Role)

Applications are invited for the above post from suitably qualified persons.

ROSIA Project - Remote Rehabilitation Service for Isolated Areas: As a Pre-Commercial Procurement (PCP) project the ROSIA project is a Horizon 2020 funded programme addressing present health care provision short-comes and where innovative digital solutions will allow the development of devices and applications capable of accompanying people in their rehabilitation journey. The project will create a catalogue of technology-based products and solutions and deliver a comprehensive service of rehabilitation; enabled by technological (Telerehabilitation) and disruptive technologies (i.e. virtual-augmented reality, depth cameras, sensors, IoT, or artificial intelligence). ROSIA will focus on seven pathologies: Chronic spinal cord injury, acquired brain injury, pneumology, arthroplasty, cardio-vascular disease, hip fracture and COVID and has four key work areas:

1. Integrated model of care to provide care continuity for patients
2. High-tech tele-rehabilitation devices and services
3. Improved patient experience
4. Sustainable business modelling.

REQUIREMENTS:

The candidate must possess the following on the latest date for receiving completed application forms for the office:

- The ability to coordinate and manage professional relationships with clinical teams, health care providers, rehabilitation and community care specialists and service managers in Ireland.
- Direct experience driving patient-led rehabilitation provision - within a hospital/community environment; and engagement with local/regional multidisciplinary teams.
- Knowledge of tele-rehabilitation (or advanced/disruptive technologies) and patient-led innovation pathways with clinicians, care providers and community out-reach engagement
- Knowledge of project design and partnership methods
- Knowledge of Action Research methodological principles in health care and design of advanced 'participatory' tools for patient-led engagements / monitoring / evaluation.
- Knowledge of GDPR Ethical and data protection practices in relation to project delivery
- Experience of collection and collation of multiple sources of data (qualitative & quantitative data) and integrating into wider programme Work Package tasks
- Experience of facilitation of engagement strategies with clinical / rehabilitation teams and across project activity and management of multiple 'stakeholder' (internal/external) groups.
- Experience of facilitation of health care 'workshops' - for patient engagement pathways; and within clinical and rehabilitation provision

The appointment is an 18 month project role initially with the potential of this to be extended for a further 18 months subject to funding. The hospital reserves the right to transfer you to alternative projects within the hospital if the need arises. Grading for the post will be commensurate with the background and experience of the post holder with remuneration not to exceed that of a Grade VI, CNM2 or a Senior OT (for AHP's) and is in accordance with the salary scale approved by the Department of Health.

Applicants for the above post should submit a letter of application and curriculum vitae no later than **12:00 noon on Thursday 7th of July 2022** to Caoimhe Mulconroy, Human Resource Department or email Caoimhe.mulconroy@nrh.ie
A job description for the above post is available on request from Caoimhe Mulconroy. For informal enquiries, please contact Ruth Maher by email Ruth.Maher@nrh.ie and Prof Aine Carroll by email aine.carroll@nrh.ie
